Personal / Team Project

AI Agent for Internal Knowledge Management

Technologies: Java, Spring Boot, Gemini API, Qdrant, MySQL, Docker, RAG Architecture

GitHub: https://github.com/bln204/AI_Agent

- Developed an AI-powered internal knowledge management system for document retrieval and intelligent question answering
- Implemented Retrieval-Augmented Generation (RAG) architecture using Qdrant vector database
- Integrated Gemini API for natural language understanding and AI-generated responses
- Built backend services with Spring Boot and managed relational data using MySQL
- Implemented document upload, embedding, semantic search, and role-based access control features
- Containerized the application using Docker for deployment and environment consistency
- Optimized RAG pipeline to reduce API usage cost and improve response accuracy
- Collaborated with Git for version control and project management

Online Comic Reading Website

Team Project – Remote Collaboration

Technologies: Java, Spring Boot, MySQL, Gradle, MVC

GitHub: https://github.com/bln204/Hjhaju_web

- Developed a web-based online comic reading platform
- Implemented backend features using Spring Boot
- Designed and managed relational database with MySQL
- Applied MVC architecture for structured development
- Collaborated remotely using Git for version control

Online Fashion E-commerce Website

Technologies: Java, Spring Boot, MySQL, Gradle, MVC

GitHub: https://github.com/bln204/casestudy_M4

- Built an online fashion shopping website
- Implemented product management, shopping cart, and order processing
- Managed database operations using MySQL
- Structured application using MVC design pattern

Experience

Java Web Back-end Trainee / Student Projects

- Developed basic Java Web applications as part of coursework and training projects
- Worked with CRUD functions, database connections, and REST APIs
- Practiced teamwork, problem-solving, and code optimization

Awards

Java Web Back-end Development

Successfully completed in October 2025, with hands-on experience in building web applications

About Me

As a final-year student, I am proactive in learning and continuously improving both my professional knowledge and soft skills. I am highly motivated, adaptable, and eager to learn from real-world working environments. I look forward to contributing to the organization while developing my skills and gaining practical experience.

Education

Van Hien University

- Major: Information Systems
 - Bachelor's Degree
- 2022 – 2026 (Expected)

Skills

- Java
- Java Web / Servlet & JSP
- Spring Boot
- HTML / CSS (Basic)
- Git / GitHub

Soft Skill

- Teamwork
- Remote collaboration
- Debugging & problem-solving

Languages

English: Basic communication, able to read technical documentation
